## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by van der Berg et al '506. van der Berg et al teach a cleaning apparatus to clean the teat cups, teats and cleaning members which is structurally similar to the Applicant's claimed device. The patented apparatus includes a mounting structure 46 of element 8, a cleaning section 68 and 84 mounted to the mounting structure 46 of element 8 and having a cleaning fluid dispensing portion to dispense cleaning fluid against the cow's udder. The cleaning section 68 and 84 are movable from a cleaning position to a retracted position. A sensor system 22 is adapted to detect if a cow is in the cleaning location. After the sensor has detected a reflected signal, it produces a control signal which causes motor 19 to be driven. Further, the cleaning apparatus of van der Berg et al is positioned within a cow parlor. Lastly, the device is able to dispense disinfectant in an upward fashion after the cow has been milked.

### ***Conclusion***

Summary: Claims 1-19 have been rejected.
